Task Analysis – Food Delivery Application (Hungry Dine)

Task Analysis:

Task Analysis is the process of understanding how users interact with a Food Delivery Application to order meals from restaurants. It breaks down the steps involved in searching for food, selecting meals, placing orders, making payments, and tracking delivery.

This analysis helps improve user experience, simplify the ordering process, and ensure smooth food delivery services.

Key Aspects of Task Analysis:

- Understanding user activities such as browsing meals, selecting food, and placing orders.
- Identifying the steps required to complete a food order.
- Analyzing problems like payment failures, order cancellation, or delivery delays.
- Improving the interface to make food ordering simple and fast.
- Ensuring secure payment processing and real-time order tracking.

User Flow:

User Flow explains how users navigate through the HungryDine Food Delivery Application to successfully place a food order.

WIRE FRAME:

User Flow for Food Delivery System:

Start → Open Application → View Onboarding Screens → Login / Register → Browse Categories → Select Meal → View Meal Details → Add to Cart → Checkout → Choose Address → Select Payment Method → Confirm Order → Order Confirmation → Track Order → End

User Flow – Step by Step:

Step 1: Start:

The user launches the Hungry Dine food delivery application.

Step 2: Open Application:

The splash screen with the Hungry Dine logo appears.

Step 3: View Onboarding Screens:

The system shows introductory screens explaining app features:

- Choose your meal
- Get special offers
- Track your order in real time

The user can skip or continue.

Step 4: Login / Register:

The user logs in using:

- Email and Password
- Google / Facebook / Apple login

The system verifies the user credentials.

Step 5: Browse Food Categories:

The home page displays categories such as:

- Burger
- Pizza
- Chicken
- Shawarma
- Sushi
- Noodles
- Grill
- Fish Fry

Users can search or explore meals.

Step 6: Select Meal:

The user selects a meal from the category list.

Example:

Jumbo Burger

Rating: 4.8

Delivery Time: 25–35 minutes

Step 7: View Meal Details:

The system displays detailed information:

- Meal description
- Calories
- Rating
- Delivery time
- Additional options

Example Add-ons:

- Extra Cheese
- Extra Steak
- Coca Meat

Step 8: Add to Cart:

The user selects quantity and adds the meal to the cart.

Step 9: Checkout:

The user proceeds to checkout and selects delivery address.

Example:

- Home
- College

Step 10: Choose Payment Method:

The user selects a payment option such as:

- Cash on Delivery

- Credit / Debit Card
- E-Wallet

Step 11: Confirm Order:

The system calculates:

Subtotal + Delivery Charge = Total Amount

The user confirms the order.

Step 12: Order Confirmation:

The system displays a success message:

“Congratulations! Your order has been confirmed successfully.”

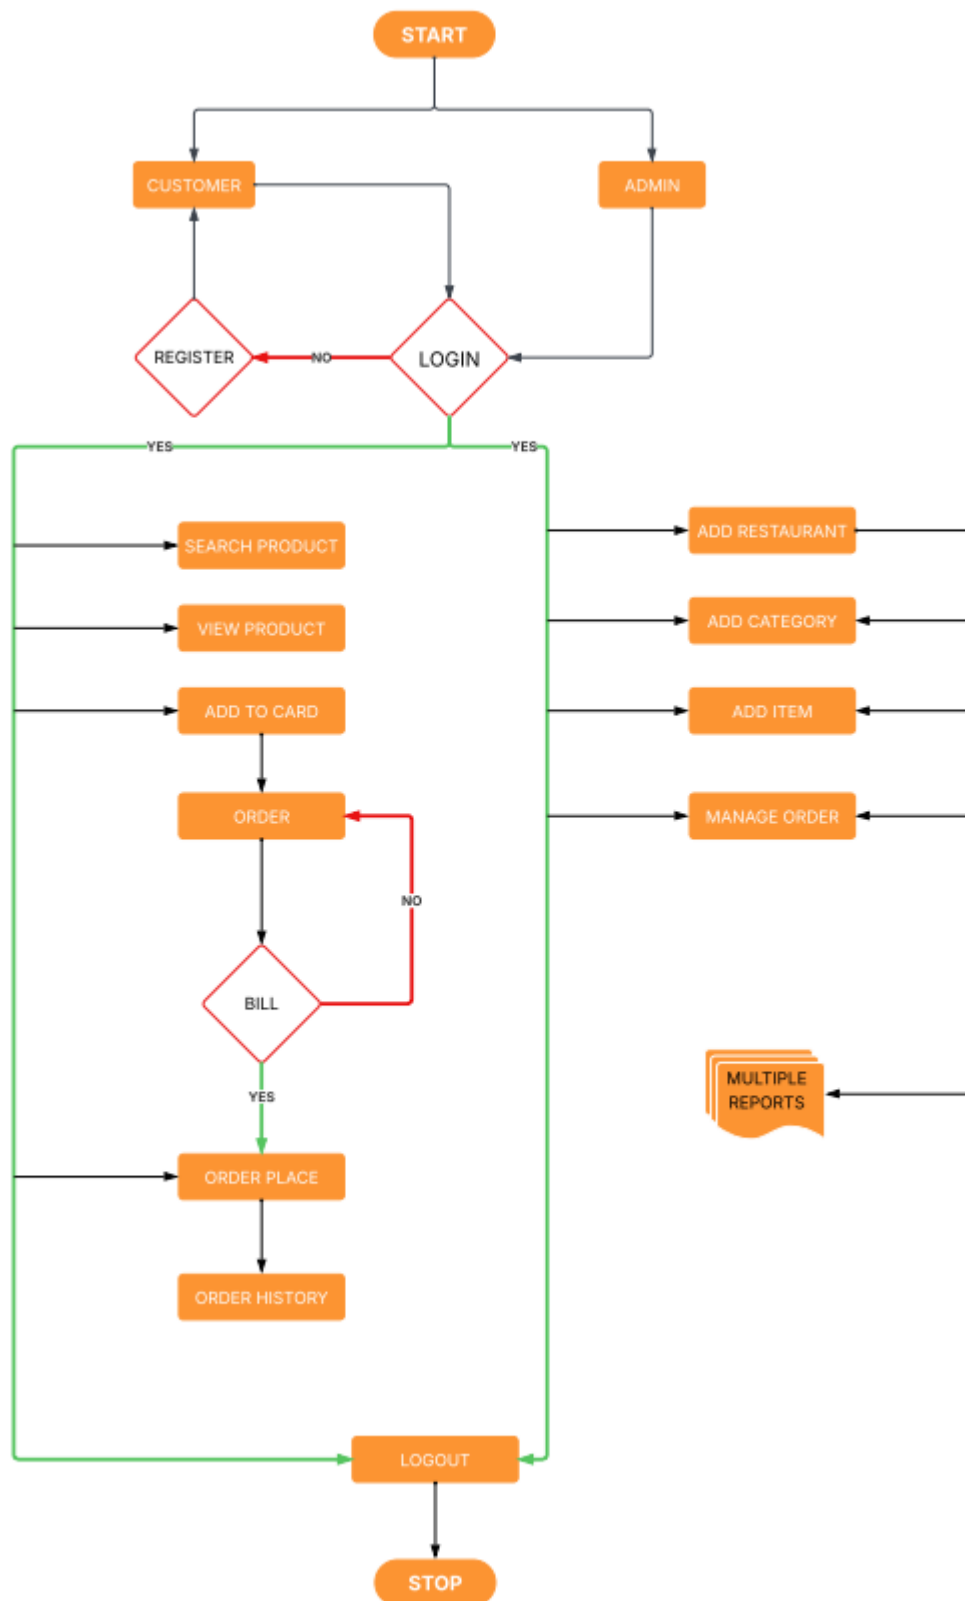

Step 13: Track Order:

The user can track the order in real time from restaurant to delivery location.

Step 14: End:

The food ordering process is completed successfully.
